

Analyzing Our Case

After reading about your case, use the graphic organizer to describe the design solution.

Case Name:

Briefly describe the problem the designers are trying to solve.

Which aspect of the community-level food system does this solution address?

Summarize the solution below—list at least three details.

Which criteria is the solution trying to target?

Who are the stakeholders involved? Who is the solution designed for?

For each part of the solution you described: Draw and/or explain the potential impact the solution could have on the food system. Use science ideas from your chapter 7 and chapter 8 consensus model to justify your thinking or justify why science ideas don't explain that part of the solution.
